

# **LAKE CASTAIC**

## **FISHING REPORT**

**WEEK ENDING 07/19/2009 WATER TEMP: Mid 70's to 80's**  
**6/17/2009 MAIN RAMP, About 1000 pounds**  
**6/15/2009 LAGOON, 1500 Pounds**

Fishing as a whole is still excellent; the stripers are doing much better than last week. They are hitting all over the lake, Elizabeth canyon, Sharon's rest, the Fore Bay buoy line, and C point. The stripers are still biting sardines, anchovies, and night crawlers. Most people are finding the smaller stripers around 40 feet of water to the surface. The bigger stripers are being found near the bottom around 80 to 100 feet deep. The large mouth bass are also biting everywhere. The large mouth are hitting on almost anything, spinners, spoons, plastics, hard baits, night crawlers and even meal worms. Most of the bass are not legal size but still put up a good fight. The occasional 4 to 7 pounders are being caught as well. Elizabeth canyon is doing extremely well on the east walls. The large mouth are also hitting very strong in the coves around Kong Island. The Catfish bite hasn't been that bad either. Lots of 5 to 9 pound catfish have been popping up everywhere, most people are catching them by fluke on a night crawler or an anchovy even plastic worms. The pan fish bite is still doing very well. Hawk's nest is still producing lots of fish and even at the marina there are lots of blue gill and crappie mixed in with large mouth. The fishing at the lower lagoon is a little slower than it is at the upper lake. There are still a lot of bass being caught, most which are legal size. No reports of cat fish being caught down there but tons of pan fish which are medium sized.

### **Whopper of the Week**

**Anglers Name:** Teri Jo Passanante      **Home Town:** Castaic  
**Species:** Cat Fish      **Bait Used:** Anchovy      **Large fish Wt.** 18.0 LBS
