

Castaic Lake

FISHING REPORT

WEEK ENDING 01/17/2010

WATER TEMP: Low to High 50's

LOWER LAKE Trout Plant: 01/12/2010 600-700 pounds

UPPER LAKE Trout Plant: 01/12/2010 100-200 LBS

Well the fishing has been slowly getting better but with the weak trout plants the upper lake keeps getting the trout and shoreline striper fishing in only good for about two to four days after the plant. With not enough trout being stocked the stripers are just not coming up really strong on the swimbaits and plugs. Stripers are still being caught around the lake in Sharron's rest and government cove and from the fore bay buoy line. These fish are being caught on night crawlers, anchovies, sardines, and squid. However the lower lagoon has been producing plenty of bigger large mouth on swimbaits to compensate the striper fishing at the upper lake. With the lower lake getting more trout than the upper, the trout fishing hot spots are all at the lower lagoon from the campsites to the spillways. The fishermen are catching trout on power bait and power worms. The large mouth fishing at the upper lake is still a little slower than usual but a few fishermen are still bringing them up on some shad baits and worms. With the forecasted rain for the next week the fishing might start to take off and really turn around for the better. So for the most up to date fishing report please call the marina at (661)-775-6232.

WHOPPER OF THE WEEK

ANGLER NAME: Robert Martinez DATE: 12/31/2009 *(See Pics on page #2)*

HOME TOWN: San Fernando SPECIES: Large Mouth Bass

WIEGHT OF STRINGER: NUMBER CAUGHT: 1 WEIGHT OF LARGEST FISH: **11 Lb 12oz**

BAIT/ LURE USED: Huddleston LOCATION CAUGHT: lower Lagoon Shoreline

COMMENTS: See Attached Pictures

ANGLER NAME: Austin Horvath DATE: 1/15/2010

HOME TOWN: Castaic SPECIES: Striper

WIEGHT OF STRINGER: NUMBER CAUGHT: 3 WEIGHT OF LARGEST FISH: 9.9

BAIT/ LURE USED: Night Crawlers LOCATION CAUGHT: Fore Bay Buoy line
