

Castaic Lake

FISHING REPORT

WEEK ENDING 01/24/2010

WATER TEMP: Low to High 50's

LOWER LAKE Trout Plant: 01/12/2010 600-700 pounds

UPPER LAKE Trout Plant: 01/12/2010 100-200 LBS

With all the weather we have had over the past week the fishing has gotten a little bit better. There doesn't really seem to be a morning bite going on as much as a late afternoon bite. Most anglers are catching stripers on cut bait still near the Fore Bay buoy line and in Sharron's Rest. Striper size has been ranging from 1 to 6 pounds; we have been progressively seeing bigger fish every week. Some stripers are being caught in the corner of the dam near the tower, most of them still being caught on bait but a few are being brought in on swimbaits and lures. Off to the right of the marina in Gov. Cove the stripers are still biting cut bait; this is where we have been seeing the bigger fish. The large mouth fishing at the upper is still a little slow but has shown a lot of progress in this past week and a half. Anglers are picking up the largemouth in the backs of the coves and off the points all over the fish arm. The bass are keying in on the natural colors like browns and greens. Plastics have been working great and some shad baits are still working but the night crawlers seem to be doing the best around the marina. Anglers are still catching trout at the lower lake on power bait and small spinners. The large mouth bite has been holding pretty steady down there and just regularly producing fish. As always for the most up to date fishing report please call the bait shop at (661)-775-6232.

WHOPPER OF THE WEEK

ANGLER NAME: *Nathan Pericosa* DATE: *01-20-2010*

HOME TOWN: *San Juan Capistrano* SPECIES: *Large Mouth Bass*
