

Castaic Lake

FISHING REPORT

WEEK ENDING 04/10/2010

WATER TEMP: High 50's to low 60's

LOWER LAKE Trout Plant: 01/12/2010

UPPER LAKE Trout Plant 2000 LBS: 04/07/2010

The department of fish and game has planted 2000 pounds of trout at the main ramp of the upper lake. The trout have been biting on Salmon each Power Bait and Berkley Atomic Teasers. Also doing very are the 1/32 oz silver and gold Panther Martins, and just a regular old salmon egg. The striper have been doing a little better with all the trout so swimbait fishing is still the best way to find those lunkers. The Huddleston and the Spro BBZ-1 are doing off the dam and shoreline around the marina. The Morning and afternoon bites are still the best times for the big guys but during the day the corner of the dam has been producing lots of decent sized stripers ranging from 2 to 8 pounds. Out on the water the striper are becoming very active near the buoy line and in some of the coves as well as Sharon's rest and Elizabeth Cyn. Sardines seem to be doing a lot better than the anchovies and are working at all of the spots just mentioned. The largemouth fishing has gotten a lot better this past week as well. Most of the coves are doing pretty well but it has been a big nightcrawler bite throughout the whole lake. Plastics and some jigs are still working for the largies. Fishing at the lower lake for pan fish is the thing to do right now, Crappie and Blue Gill are in abundance all over the lower lake. The Crappie are still lovin the wax worms and the blue gill like red worms.

WHOPPER OF THE WEEK

Sorry No Whoppers This Week.
