

Castaic Lake

FISHING REPORT

WEEK ENDING 11/20/2010

WATER TEMP: Mid to High 60's

LOWER LAKE Trout Plant: 01/12/2010

UPPER LAKE Main Ramp 1500 lbs: 11/09/2010

With another trout plant scheduled hopefully these bigger stripers will come up from the bottom and stop feeding off the bait. For the most part the stripers that are being caught are at the bottom between 90 and 120 feet. Blood worms and sardines are catching the bigger stripers and the most productive place for the stripers is at the buoy line. There are a few places in the fish arm near Elizabeth and it's the same story, bait fishing between 90 and 120 feet. The largemouth fishing has had mixed results lately. Some anglers are having a really tough time catching these finicky largies but the anglers who are catching have been using crankbaits and a few plastics. The bass are in there typical spots and hovering around 5 to 15 feet. The lagoon fishing is doing alright with the decrease in water level, its about 5 feet lower now and the fish seem to be liking it. The largies are also biting the plastics and crankbaits and the lagoon.

WHOPPER OF THE WEEK!

SORRY!! NO WHOPPER TO REPORT THIS WEEK.
